SUMMARY

M.Tech student in Artificial Intelligence and Data Science (Specialization in Cyber Security) with practical exposure to Linux, Python, mobile application analysis, network security, and security-focused projects. Interested in applying these skills to real-world cybersecurity and digital forensics challenges.

EXPERIENCE

CCTV Analysis Tool for Forensic Labs | Aug 2025 – Dec 2025

- Built a CCTV analysis tool for forensic use cases using Python, YOLOv8, OpenCV, and Streamlit.
- Implemented person detection, tracking, and single-video person re-identification.
- Generated annotated videos, snapshots, and CSV/JSON logs for investigation workflows.

Mobile Security and Forensic Analysis Lab Work | Jan 2026 – Apr 2026

- Gained hands-on exposure to Android application analysis using ADB, MobSF, APKTool, JADX, QARK, Frida, and Objection.
- Worked on static analysis, dynamic testing, APK inspection, and security assessment tasks in lab environments.

Domain-Specific RAG Chatbot for Cybersecurity / Digital Forensics | Feb 2026 – Apr 2026

- Built a Retrieval-Augmented Generation (RAG) system for domain-specific question answering.
- Worked with document ingestion, chunking, retrieval pipelines, embeddings, and local/open models.

EDUCATION

M.Tech in Artificial Intelligence and Data Science (Specialization in Cyber Security)

National Forensic Sciences University, Goa | 2025 – 2027

SPI (Semester 1): **8.15**

B.Tech in Computer Science and Engineering (Cybersecurity)

Sri Indu College of Engineering and Technology | 2021 – 2025

CGPA: **6.9**

SKILLS

Technical Skills: Linux, Python, SQL/MySQL, network security, log analysis, mobile app analysis, digital forensics basics, RAG.

Tools: Wireshark, Nmap, Burp Suite, ADB, MobSF, APKTool, JADX, Frida.

Certifications: Cybersecurity Professional Program — ICTRD, CEH from Scratch, Foundations of Cybersecurity
